And

2. (Amended) The transparent substrate of claim 1, wherein the refractive index of the high-index multilayer comprising at least one titanium oxide layer is between 2.25 and 2.38.

N2

- 11. (Amended) The transparent substrate of claim 1, wherein the at least one additional high index layer has a refractive index of between 1.9 and 2.2 and comprises tantalum oxide, zirconium oxide, tin oxide, indium oxide, zinc oxide, silicon nitride, or aluminum nitride.
- 12. (Amended) The transparent substrate of claim 1, wherein the high-index multilayer comprises two contiguous layers and the additional high index layer is closer to the substrate than the titanium oxide layer.

thin layers have a refractive index between 1.30 and 1.65 and comprise one or more of silicon oxide, aluminum oxide, aluminum oxyfluoride, aluminum fluoride, and magnesium fluoride, wherein the oxides are optionally halogenated.

A Subje

20. (Amended) A glazing comprising the transparent substrate of claim 1.

15

25. (Amended) The glazing of claim 21, for use as the internal or external glazing for buildings, to protect paintings, a motor-vehicle window, a mirror, a display screen, a decorative glass, a shop window, a shop-counter, or a refrigerated display-cabinet.

For the Examiner's convenience a complete list of the currently pending claims is attached hereto as Appendix B.
